♥ Derwent Abstract:

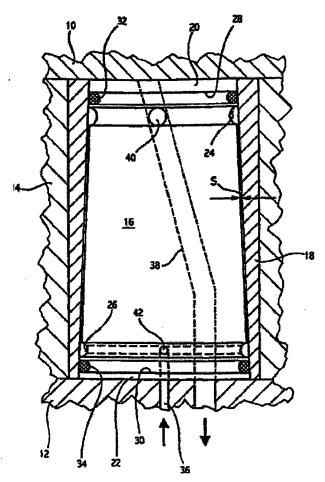

(DE19906026A) Novelty - The casting device can cast a bush such as a cylinder line into a cylindrical casing. The bush is set on the tail spindle of the casting tool,

which is cooled by coolant during casting. There is an annular gap between the tail spindle (16) and the bush (18) for the direct cooling of the bush with a coolant. The

gap may be between the tail spindle guide connections (20, 22).

Use - For casting at least one bush in a casing.

Advantage - Easier to cast thin bushes, e.g. by chill-mold process.

Description of Drawing(s) - The drawing shows a longitudinal section through the device.

Tail spindle 16, Bush 18, Tail spindle guide connections 20, 22 Dwg.1/1

1. Vorrichtung zum Eingießen zumindest einer Buchse in ein Gehäuse, insbesondere einer Zylinderlaufbuchse in ein Zylindergehäuse einer Hubkolbenmaschine, wobei die Buchse auf eine Pinole des Gießwerkzeuges aufgesteckt und die Pinole während des Gießens mit einem Kühlmedium gekühlt ist, dadurch gekennzeichnet, daß zwischen Pinole (16) und Buchse (18) ein ringförmiger Spalt (s) zur direkten Kühlung der Buchse (18) mittels eines Kühlmediums vorgesehen ist.
